NPL Services for Examiners

Tuesday, May 20, 2003

STIC's mission is to connect examiners to critical prior art by providing information services and access to NPL electronic resources and print collections. A STIC facility is located in each Technology Center.

Most of the electronic resources listed on these Web pages are accessed via the Internet. You must be authenticated for data to be accessed.   Firewall Authentication

The following characters have specialized meaning:

Special Characters	Description
, ( ) [	These characters end a text token.
= > < !	These characters end a text token because they signify the start of a field operator. (! is special: != ends a token.)
` @ \Q < { [!	These characters signify the start of a delimited token. These are terminated by the end character associated with the start character.

1 Artificial intelligence in the personal computer environment,   84%
today and tommorrow (panel session)
Tom J. Schwartz , James Johnson , Steven Hardy , M. Mitchell
Waldrop , Stan Curtis , Carroll Ray Hall , Edward C. Patterman ,
Kenneth Ross , Wanda Rappaport , Aaron Goldberg , Henry Seiler
Proceedings of the 1985 ACM annual conference on The range of
computing : mid-80's perspective: mid-80's perspective October 1985

2 Intelligent mediation: an architecture for the real-time allocation   84%
of interface resources
Russell Ovans , William S. Havens
Proceedings of the 1st international conference on Intelligent user
interfaces February 1993

3 Merging expert system with multimedia technology   82%
Janice C. Sipior , Edward J. Garrity
Proceedings of the 1990 ACM SIGBDP conference on Trends and
directions in expert systems September 1990

4 The potential of artificial intelligence to help solve the crisis in   80%
our legal system

Donald H. Berman , Carole D. Hafner
Communications of the ACM August 1989
Volume 32 Issue 8
> The laws that govern affluent clients and large institutions are numerous, intricate and applied by highly sophisticated practitioners. In this section of society, rules proliferate, lawsuits abound, and the cost of legal services grows much faster than the cost of living. For the bulk of the population, however, the situation is very different. Access to the courts may be open in principle. In practice, however, most people find their legal rights severely compromised by the cost of legal ...

5 Parallel execution of prolog programs: a survey   80%
Gopal Gupta , Enrico Pontelli , Khayri A.M. Ali , Mats Carlsson , Manuel V. Hermenegildo
ACM Transactions on Programming Languages and Systems (TOPLAS) July 2001
Volume 23 Issue 4
> Since the early days of logic programming, researchers in the field realized the potential for exploitation of parallelism present in the execution of logic programs. Their high-level nature, the presence of nondeterminism, and their referential transparency, among other characteristics, make logic programs interesting candidates for obtaining speedups through parallel execution. At the same time, the fact that the typical applications of logic programming frequently involve irregular computatio ...

6 Image analysis and enhancement using fuzzy rule based expert   80%
system
Ali Asgharzadeh
Proceedings of the 1996 ACM symposium on Applied Computing
February 1996

7 Expert system applications in customer service   80%
Stephen Schon , Omar Keith Helferich
Proceedings of the conference on The 1987 ACM SIGBDP-SIGCPR Conference March 1987
> The competitive edge of using expert system technology is beginning to have an impact on the marketplace. Described here are applications of expert system technology to customer service and many of the ideas presented here are applicable to other areas of business as well. This project was accomplished in cooperation with the Customer Service Department of a major U.S. chemical company, and this paper describes the design, implementation, and results of a diagnostic expert system prototype ...

8 The Credit Act Advisory System (CAAS): conversion from an   80%
expert system prototype to a C++ commercial system
George Vossos , John Zeleznikow , Allan Moore , Dan Hunter
Proceedings of the fourth international conference on Artificial
intelligence and law August 1993

> CAAS is a rule-based expert system, which provides advice on the
> Victorial Credit Act 1984. It is currently in commercial use, and has
> been developed in conjunction with a law firm. It uses an
> object-oriented hybrid reasoning approach. The system was initially
> prototyped using the expert system shell NExpert Object, and was
> then converted into the C++ language. In this paper we describe
> the advantages that this methodology has, for both commercial
> and research development.

9 The use of meta-rules in rule based legal computer systems   80%
Uri J. Schild , Shai Herzog
Proceedings of the fourth international conference on Artificial
intelligence and law August 1993

> Rule-Based Systems in the legal domain are often obtained by
> formalizing legislation. We consider the addition of meta-knowledge
> in the form of meta-rules to such a system. Such an approach has
> many advantages both for control and for dealing with the intrinsic
> vagueness of legal rules. Legal computer systems of different kinds
> have been proposed and built over the years. In this paper we shall
> present a legal reasoning system which uses concepts discussed in
> this paper. The system consists ...

10 Intelligence systems: a sociotechnical systems perspective   80%
James A. Sena , A. B. (Rami) Shani
Proceedings of the 1999 ACM SIGCPR conference on Computer
personnel research April 1999

11 Knowledge acquisition and representation techniques in scholarly 80%
communication
Brian R. Gaines , Mildred L. G. Shaw
Proceedings of the 13th annual international conference on Systems
documentation: emerging from chaos: solutions for the growing
complexity of our jobs February 1996

12 Using the semantic web: Agent-based semantic web services   77%
Nicholas Gibbins , Stephen Harris , Nigel Shadbolt
Proceedings of the twelfth international conference on World Wide
Web May 2003

The Web Services world consists of loosely-coupled distributed systems which adapt to ad-hoc changes by the use of service descriptions that enable opportunistic service discovery. At present, these service descriptions are semantically impoverished, being concerned with describing the functional signature of the services rather than characterising their meaning. In the Semantic Web community, the DAML Services effort attempts to rectify this by providing a more expressive way of describing Web ...

13 A review of barriers to expert system diffusion   77%
  Donald E. Hardaway , Richard P. Willi
  Proceedings of the 1990 ACM SIGBDP conference on Trends and
  directions in expert systems September 1990

14 An example of management training in expert systems: SBA loan 77%
  evaluation system
  Sudesh M. Duggal , Paul R. Popovich
  Proceedings of the 1990 ACM SIGBDP conference on Trends and
  directions in expert systems September 1990

15 EPIC expert assistant calculator: an expert system to facilitate   77%
  eligibility and savings determination for a state-sponsored drug
  insurance program
  Arthur Nizza , Gunther R. Geiss
  ACM SIGCAS Computers and Society , Proceedings of the conference
  on Computers and the quality of life August 1990
  Volume 20 Issue 3

16 Reusability library framework (RLF)   77%
  J. J. Solderitsch , M. A. Simos , K. C. Wallnau
  Proceedings of the conference on TRI-Ada '88 July 1989

17 Representation methods for software reuse   77%
  W. B. Frakes , P. B. Gandel
  Proceedings of the conference on Tri-Ada '89: Ada technology in
  context: application, development, and deployment January 1989
    Many methods for representing software components for reuse
    have been proposed. These include traditional library science
    methods, knowledge based methods, and hypertext. In this paper,
    we survey and categorize these methods, and discuss systems in
    which they have been used.

18 Four paradigms of information systems development   77%

Rudy Hirschheim , Heinz K. Klein
Communications of the ACM October 1989
Volume 32 Issue 10

> Developing computer-based information systems necessarily involves making a number of implicit and explicit assumptions. The authors examine four different approaches to information systems development.

19 An expert system for maintenance of riveting machines, vol. 1.   77%

Patrick W. Daley , Osama K. Eyada
Proceedings of the second international conference on Industrial and engineering applications of artificial intelligence and expert systems - Volume 1 June 1989

> Rapid diagnosis and repair of riveting machine malfunctions are essential to meet critical production schedules at Boeing Military Airplanes. Repairs are often delayed because the maintenance technician assigned may lack the knowledge and experience required to quickly isolate and correct the problem. This paper presents an Expert Maintenance System for Riveters (EMSR) developed to assist inexperienced technicians with the diagnosis and repair of nine Boeing modified Gemcor 400/200A CNC riv ...

20 The coming revolution in interactive digital video   77%

Edward A. Fox

14 A.I. and computational logic: Executable declarative business 77%
 rules and their use in electronic commerce
 G. Antoniou , M. Arief
 Proceedings of the 2002 ACM symposium on Applied computing March
 2002
  Business rules are statements which are used to run the activities

of an organization. In the era of electronic commerce it is important for these rules to be represented explicitly, and to be automatically applicable. In this paper we argue that methods from the field of knowledge representation can be used for this purpose. In particular, we propose the use of defeasible reasoning, a simple but efficient reasoning method based on rules and priorities. We motivate the use of defeasible reasonin ...

15 Toward the domestication of microelectronics   77%
Joel S. Birnbaum
Communications of the ACM November 1985
Volume 28 Issue 11
The great challenge for computer science in this decade is to make computers usable by everyone. Computers, long viewed as a dehumanizing force, will become the most powerful means of personal creative expression and communication ever known.

Helena Karsten
ACM SIGMIS Database March 1999
Volume 30 Issue 2
Collaborative information technologies have been claimed to enhance collaboration in organizations, under certain conditions. This claim was found problematic in several respects, also in the light of the results of 18 case studies of Lotus Notes use, taken from the literature. The cases may be split into three groups: (1) exploratory, conservative, or cautious use; (2) planned and expanding use; and (3) extensive and engaged use of Notes. In the first group, no changes in work arrangements due ...

ACM Transactions on Information Systems (TOIS) July 1986
Volume 4 Issue 3

Every office is an open system, and the products of office work are the result of decentralized negotiations. Changing patterns of task organization and alliance inevitably give rise to inconsistent knowledge bases and procedures. This implies that there are no globally correct answers to problems addressed by OISs. Rather, systems must deal with multiple competing, possibly irreconcilable, solutions. Articulating alternative solutions is the problem of due process. This pr ...

ACM SIGDOC Asterisk Journal of Computer Documentation June 1995
Volume 19 Issue 2

Paper journals, conferences and workshops have been the major media for scholarly discourse for 300 years. However, in the 1990s access to low-cost personal computing and Internet communications is leading to radical changes in the operation of scholarly communities. Electronic publication and conferencing is becoming common in all disciplines using commonly available Internet facilities such as ftp archives, list servers, gopher and world-wide web. Some scholarly communities that had not previo ...
